

Sound Seal Testimonial

4/26/08

Location: Artis Capital Management offices in SF-1 Market St.

Application: Exercise & Weight room

Product specified: Impacta Jumpax

Testimonial from: Kai Braun with Hathway Dinwiddie (GC)

We met with Dan Callahan from Conklin Brothers and Scott Dilling with Commercial Solutions regarding our specific project. Our concerns were with noise from the exercise & weight room on the 27th floor traveling to the offices on the 26th floor below us.

We had worked with the architect who had specified some high-end luxury vinyl squares with a type of backing that needed to be glued down. We also were working with needing to build the finished surface to 1/2", in order to match up to some marble that this would butt up against.

Dan brought Scott into a meeting with Cory Stewart from Artis and myself. Scott made a presentation to us with all the documentation and samples. We also made some calls to Cristina Miyar at Charles Salter Associates about this product.

Our project is around 1800 s/f and we have installed the Impacta Jumpax and the luxury vinyl in April 2008, and are extremely pleased with the results. The noise from the exercise bikes and weight machines is unnoticeable by the office staff on the 26th floor. So far the heavy objects in that room are having no effect on the vinyl or the Impacta product.

We would recommend this product to others and we will try to use the Sound seal products in some of our other projects in the future.

Respectively,

Kai Braun
